

Hybrid Training Event in Czeszochowa: An on-site event in Czeszochowa with online participation available for representatives from the other V4 countries and additional stakeholders. The workshop will present the project's results to a broad audience, including business professionals, educators, and industry experts. It will feature practical demonstrations of the educational materials and the advanced forecasting tools developed during the project. Representatives of universities, organizations, and companies beyond the partner institutions will also be invited, ensuring that the workshop serves as a platform for cross-sector knowledge transfer and collaboration extending beyond the project's immediate consortium.

The **18 September 2026 - seminarium** is currently taking the following shape:

- The event will last approximately **2–2.5 hours**. Polish partner will chair and moderate the workshop in **Polish**.
- We can begin at **10:00 a.m.** (the exact timing within the agreed interval is up to you).
- Hungarian partner will give a **25 minute** presentation in **English**, introducing the reasons behind launching the project and providing an overview of its overall structure.
- Polish partner will then present the characteristics of his educational materials in **Polish** for approximately **35–40 minutes**.
- Slovak partner will provide a brief **15-minute** presentation in **English**, introducing the version developed for their application area.
- This will be followed by a **45–50 minute** discussion with both the in-person and online participants to collect their feedback and jointly outline an effective implementation strategy for the educational program. **This would also provide an opportunity for invited participants to give brief presentations.** This discussion will be conducted in **Polish**.
- Lunch
- Informal discussion
